

Joint project of our school with a primary school in Germany. Girls from class 7.A prepared a knowledge quiz about the Czech Republic in English for German students. Subsequently, the German side sent a quiz about Germany, which the girls managed with little help from the Internet.

The aim of the project was to deepen communication skills in English and to refresh knowledge about Germany.

Class 7.A girls

Girls work on the test – The best question was: How many cats live in Germany? 😊

The class work on German test in pairs.

This year, the second joint project of our school with a primary school in Germany was a small challenge, not only for English teachers, but also for girls from the class 8.C. Together we came up with three Czech recipes for our partner school in Germany, translated them into English. We received two German recipes from our partners, which the girls successfully cooked during cooking classes.

We all enjoyed the new experience and we believe that with this small project we managed to maintain good relations with our German partner.

Here are our chefs from 8.C class.

The cooking process.

Our girls have so much fun with cooking your recipes.
